

# Analytics Maturity Assessment

Seed Analytics provides data strategy and analytics implementation services to help organisations grow.

## 1. Assessment Framework

We evaluate organisations across five dimensions: data governance, technology stack, skills, processes, and culture.

### 1.1 Scoring Methodology

Each dimension is scored from 1 (ad hoc) to 5 (optimised). The overall maturity level is the weighted average.

## 2. Findings Summary

| Dimension        | Score | Priority |
|------------------|-------|----------|
| Data governance  | 3.2   | Medium   |
| Technology stack | 2.8   | High     |
| Skills           | 3.5   | Low      |
| Processes        | 2.5   | High     |
| Culture          | 3.0   | Medium   |

## 3. Recommendations

1. **Technology consolidation** — Reduce tool sprawl and standardise on a core platform.

2. **Process documentation** — Formalise data workflows and quality checks.
3. **Upskill team** — Invest in analytics training for business users.
