Primary Logo Variation

The preferred variation of our logo is the navy blue logo on a background that does not make any of the text in the logo illegible - preferably a solid white background.

Secondary Variation

Where our logo appears on a darker background, the logo will appear in white or Seed Analytics Silver.

Our Logo — Incorrect Usage

Incorrect Logo Version — Original Logo

Do not use the original Seed Analytics logo or any variation thereof.

Incorrect Logo Version — By Comotion Variation

Do not use the Seed Analytics By Comotion logo.

Conflicting Color Backgrounds

Do not use the full-colour logo on a background that conflicts with the logo, or makes the logo difficult to read.

Scaling

When scaling the logo, be sure to scale it in proportion and not stretch it either vertically or horizontally.

Incorrect Color Variations

Do not adjust the colours of the logo.

Shadow and Effects

Do not add any text effects, including shadows, to the logo.

Logo Element Configuration

Do not adjust the position or placement of the individual logo elements.

Light Backgrounds

Do not use the white logo on a background where any part of the logo becomes illegible.

The logo is shown at an angle, tilted upwards to the right, which is incorrect according to the brand guide.

✓ seed analytics

Rotation

Do not rotate the logo.

The word "seed analytics" is displayed in its correct font and size, but the icon is missing, which is also incorrect.

seed analytics

Icon Removal

The logo text must not appear without the icon.

The logo is placed over a complex, low-angle photograph of a modern glass skyscraper. The background image is dark and busy, making the logo difficult to see and read.

✓ seed analytics

Color logo

Do not use the full-colour logo on an image background, where the image background makes any part of the logo difficult to see or read.

Standalone Icon

Unless it is being used for a favicon or background design element, the icon should not appear as a standalone representation of the brand, in place of the full logo.

Gold Variations

The Seed Analytics Gold itself has three variations depending on the usage. Where gold text appears on a light background and the text looks too light to read (particularly noticeable if the text is small), use Seed Analytics Dark Gold. Where gold text appears on a dark background, use Medium Gold for text, and Light Gold for accents or highlights.

Plus Jakarta Sans

For headings, use Plus Jakarta Sans. It is a freely available on Google Fonts, and can be [downloaded here](#).

Sora

For bodycopy, use Sora. It is a freely available on Google Fonts, and can be [downloaded here](#).

Font Weights and Usages

Plus Jakarta Sans Light for Headings

Plus Jakarta Sans Medium for Sub-Headings

Sora Regular for body copy

Dark Backgrounds

Where type appears on a darker background, type will appear in white, Seed Analytics Silver, or Seed Analytics Light Gold.

Light Backgrounds

Where type appears on a lighter background, type will appear in Seed Analytics Navy Blue or Seed Analytics Dark Gold.

Alternative Font — Arial

Where Plus Jakarta Sans or Sora are not available, Arial can be used as an alternative font, and is readily available on most operating systems and applications.

Choosing and Sourcing Photos

When choosing photos, we look for images that either show a person who could be an advisor engaging with a client in a positive manner, a photo of someone who could be an advisor looking professional, specifically with an overall warm colour tone, or abstract images. Where using images of abstract imagery, the image should be overlayed with the Seed Analytics Navy Blue (see next page). We encourage the use of stock photography from free stock photo resources—such as [Unsplash](#), [Pexels](#), and [Pixabay](#). Before using a photo, please be sure to read the full license requirements for photo usage, to ensure that we are fully compliant. License requirements may vary from image to image, even on the same website, so please be sure to check each individual image.

Image Treatment

In certain instances, we pair our messaging with an image that has a 'Seed Analytics Navy Blue' colour overlay. When this occurs, it is important that the image is prepared in a specific way.

In an image editing application like Photoshop or any product in the Affinity suite, the full-colour original image should be the base layer.

On top of that should be a 'color' or 'colorize' layer, filled with 'Seed Analytics Navy Blue'. On top of that should be another layer set to 'normal', also filled 'Seed Analytics Navy Blue', with an opacity of 90%.

Email Signatures

The email signatures are kept simple to reduce the risk of rendering issues across the various email platforms. Avoid the use of tables and columns, and keep the formatting to font sizes and colours.

Kind regards,

Name Surname

Job Title | Secondary Job Title or Descriptor

name@seedanalytics.info | +27 83 XXX XXXX | www.seedanalytics.info

www.linkedin.com/in/username | www.twitter.com/username

Data Analytics | Consolidated Statements | Enterprise | Book a Demo

A disclaimer can be placed below the footer. It should be at a smaller font size than the rest of the signature. If the rest of the signature is 11pt, the disclaimer text should be 9pt. If using Google Workspace, the disclaimer text can be set to 'small'. The font colour should be hex value #B4B4B4.

Font

All text should be Arial, and should match the font size of the rest of the email body. This is typically 'Normal' if using Google Workspace, or 11pt if using Outlook or similar applications.

Colours

The body of the email and most signature text should be Seed Analytics Navy Blue (#051F4C). Dividers should be #B4B4B4.

Links

Standard links should appear in Seed Analytics Navy Blue (#051F4C), while Call-to-Action links should appear in Seed Analytics Medium Gold (#B5AFA2). Please check your application settings to ensure that underlines are not added to the links.

Logo

The width of the logo image should be set to 350px.

Social Media Post Styling

For social media posts, we recommend using either a stock photo that appears without any text on it, or if there is text, that any text appears over a colourized abstract background, as per the samples below. Please be sure to use the correct fonts and brand colours.
